

THE MISSISSIPPI EMPLOYERS HEALTH DATA SET

Sponsored by The Mississippi Business Group on Health

The Mississippi Business Group on Health (MSBGH) has partnered with Vigilant Health to create the Mississippi Employer Health Data Set (HDS) for MSBGH members.

PURPOSE

The purpose of the HDS is to allow employers to create transparency and accountability among all stakeholders in the health care system by pooling data, sharing experiences, and applying state of the art analytics to develop solutions that lower plan costs and improve the health and productivity of their members.

HDS FEATURES

- ▼ Highly secure and trusted data warehouse to support understanding and decision making
- ▼ Web-based and easy-to-access reports
- ▼ Industry-leading analysis and health care intelligence
- ▼ Regular accumulation of data for real-time updates
- ▼ Data visualization where users can personalize and interact with information

The data, analytics, and reports generated by the HDS will be used, among other things, to perform comprehensive utilization, quality of care, and cost analyses of particular providers and groups to enable self-insured members who participate to evaluate and provide effective incentives for improving care and reducing costs. The reports will also include an analysis of the overall population's health profile in the form of a plan of care. All data will be de-identified and is HIPAA compliant.

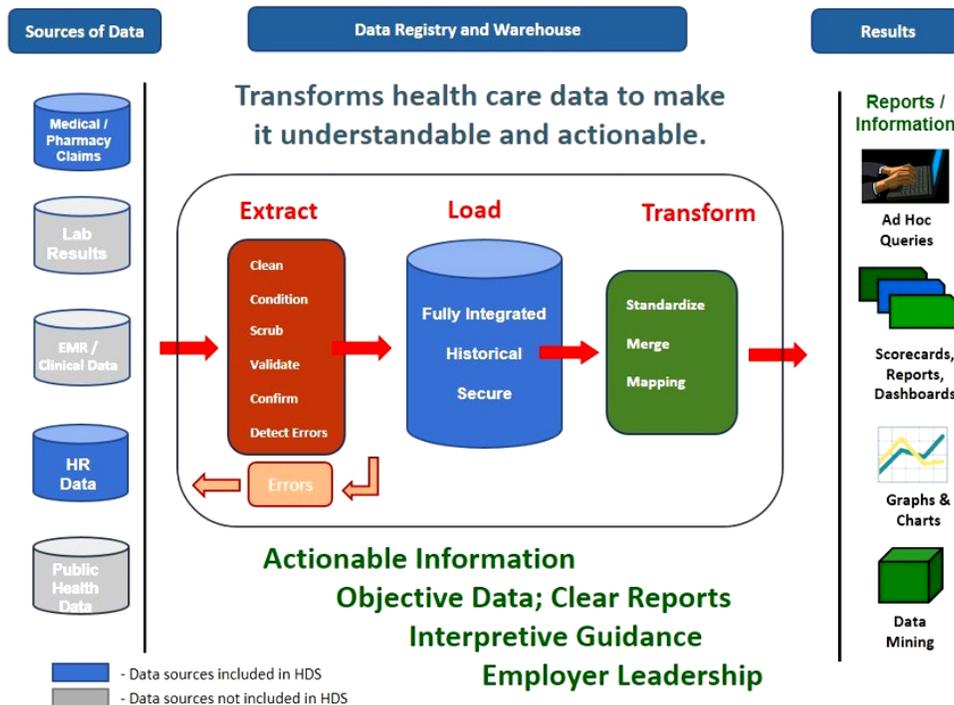

COLLABORATION

The Health Data Set puts state-of-the-art tools to work for Mississippi employers through collaboration with national health care leaders and community physicians.

HDS WAREHOUSE FUNCTIONALITY

The HDS Gives Employers the Tools They Need
To Make Good Business Decisions About Health Care

About Vigilant Health

Vigilant Health transforms employer health management through its model of integrated care and shared savings. By seamlessly integrating onsite and near site clinics, vigorous health education and lifestyle management programs, data registries, individual care management, chronic disease management, and local physician collaboration through shared information and savings, Vigilant Health achieves immediate results, dramatically reducing health plan costs, and improving the health and productivity of employees and dependents.
